2016 Commercial Cowman's Genetic Guide

Practical, Predictable, Profitable

Profit From Genetic Progress

2016 Commercial Cowman's Genetic Guide - Practical, Predictable, Profitable

Wow! What a year 2015 was. Record setting profits for almost everyone in the cattle business. Kelli and I would like to thank you, all of our loyal customers for making 2015 our best year ever for number of head A.I.'d and semen sales. We feel very blessed to be able to work with some of the best people and cattle in the world.

Fast forward to 2016. Volatile markets have led to more uncertain times. None of us have control over this. What we can control are the inputs into our herds including feed, management and genetics.

We have decided to take a little different approach to our semen marketing this year. The bulls represented in this catalog are what we think will work best for a majority of producers in southwest Nebraska and surrounding areas. They are predominately highly proven sires that will present few surprises. The Angus bulls were selected with heavy emphasis toward their performance in the Circle A Sire Alliance progeny test, which we feel is the gold standard in the beef industry. It compares bulls based on how 100% of their steer crop performs. That is a stark contrast to most of the data used to generate EPDs, which is sent in only on the animals that the breeder chooses, not the whole herd.

The majority of the bulls in this catalog are from a strong maternal base as most of you plan to keep replacements. We try limit our selections to bulls that are near average or below for milk, because that is all that most of your production systems will support, especially in dry years. In addition to maternal we place much emphasis on feedlot performance. Like many of you, we also feed cattle to finish and understand the value of efficient performance and payweight. As with anything, balance is the key in genetic selection.

Having said that, we realize that every operation is a little different and if there are other bulls in the main ABS Beef Sire Directory that better serve your goals we are glad to get them for you. In addition to that we can get semen on anything available in the Origen sire directory. If you would like either one of those directories let us know and we will see that you get one.

Beyond that I wanted to share something I heard from Dr. Cliff Lamb last fall that I believe to be true. He said **"Pregnancy is likely the single most important 'trait' for every beef cattle producer. Synchronization combined with AI is the most powerful tool that producers have to impact the fertility in their operations."** As I think about that I wonder if we are asking ourselves the right questions when it comes to herd fertility. We always talk about A.I. conception rate and of course we still want that to be as high as possible, but isn't a percentage of the herd calved in the first 30 days the more important question? What can we do to improve this? I believe that using a CIDR or

progesterone based synchronization and A.I. program on the late calving cows in your herd is worth the investment in the return you will get from moving those cows forward closer to the front of your calving season, not counting any genetic benefit you will gain from breeding to a high quality proven bull. If you have not A.I. bred cows before or if you have only bred the early calving cows think about this and give me a call. I would be happy to discuss it more with you.

If you have never A.I.'d anything before, now is the time to start. With bull prices at the current levels in most cases it is less expensive to A.I. to a proven bull than to own an unproven one. If you don't think you have the facilities or crew or are unsure how this all works give me a call today. We will come and look and help figure out how to get it done. With modern portable facilities it really is easier than you may think. With nearly 100,000 head serviced in the past 10 years we have the people, facilities and experience to get the job done right.

Please note that Spring Special pricing ends on some of the bulls March 30th (see list inside back cover). I encourage you to order early. Also remember that ABS offers 0% interest financing until November 10, 2016 on all orders of \$600 or more on ABS bulls. Alternatively we can give a 3% discount if paid in full 10 days after your order. Just let us know what you prefer when you order.

We are as excited as ever about this spring and look forward to getting out in the field and working on your operations to help generate more profit for you in the coming years.

Lena, Travis, Kelli, Henry

Proven Sire Alliance bulls deliver profit and predictability from Pasture to Plate™

Long lasting, productive and profitable daughters

IN THE PASTURE

Beyond performance, carcass value and efficiency, daughters of Sire Alliance bulls are monitored for maternal function and profitability.

The Sire Alliance Maternal Index incorporates daughter productivity and fertility data including Heifer Pregnancy and Stayability.

High performing steers backed by documented efficiency genetics

IN THE FEEDLOT

The Sire Alliance is the longest running program of it's kind with progeny individually measured for feed intake since 1998.

While high feed cost in recent years has made feed efficiency a key trait of interest, no one can match the Sire Alliance's foresight and decade and a half of intake measurements.

Carcasses that deliver quality and cutability to earn grid premiums

ON THE RAIL

Today, the Sire Alliance and Circle A Ranch are the largest contributors to the American Angus Association carcass data base.

The typical Sire Alliance graduate has 30 steer progeny evaluated for carcass merit which by itself generates higher reliability and accuracy levels than 90% of the bulls that qualify for the Main Sire Summary listing.

The Angus Sire Alliance Program was initiated by Circle A Angus Ranch in 1996 to objectively measure commercial performance and real world value from birth-to-harvest. The program pioneered the use of selection indexes in the beef industry and remains the most comprehensive source of feedlot profit, efficiency and maternal performance.

ABS has been a marketing partner with Circle A since the first bulls graduated in 1998 and the Sire Alliance program has been an exclusive ABS progeny testing program since 2008. The data derived on ABS sires not only provides you, our customers, added accuracy and reliability, but also unique and valuable insight into feed efficiency and commercial profitability that is not available anywhere else today.

Beyond the proven Sire Alliance graduates offered in this directory, we are also utilizing Sire Alliance data to develop and select the next generation of ABS sires.

TOTAL PROFIT

- ✓ Real World Data™ for real world profit
- ✓ Complete performance data from birth to harvest including:
 - Calving Ease
 - Pre-weaning performance
 - Feedlot gain and intake
 - Carcass yield and quality
- ✓ Derived from large commercial contemporary groups
- ✓ The first modern beef selection index in 1996 and still the most comprehensive

STOCKMEN'S SOURCE BEEF BULLS

2016 SEMEN DIRECTORY - ANGUS

Stockmen's Source is a joint genetics and bull marketing venture between Chrisman Family Cattle and Broken Bar M Ranch, Jeremy & Gail Martin from Hershey, NE. We focus on maternal Angus and SimAngus genetics that will thrive in range environments and still produce calves that grow fast and offer good payweight in the feedlot. We closely monitor mature daughter weight in relation to yearling and carcass weight in order to produce true 'curve bender' cattle. Our emphasis on older, more proven genetics from older sires and dams results in EPDs that are behind many of the sires available to use.

However, we have fed these cattle to finish and do not see the difference. In fact, often times they have out-performed other sires that offer more growth on paper. If you are looking to build a strong maternal foundation with genetics stacking several generations of proven bloodlines this group of bulls is worth your consideration.

**CALVING
EASE** ★★

This outcross performance bull made history at the 2011 Cole Creek Angus sale where he became their highest selling bull ever. He was selected for his powerful phenotype and tremendous individual performance coming out of a herd that is forced to work in a real world environment. He continues to impress us more with every calf we get. Currently his progeny record average performance ratios of 101 at weaning and yearling time and 103 for ribeye. Like most great bulls, he comes from a great dam who has produced 10 natural calves at 108 nursing ratio and 111 yearling ratio. He is a stout-featured, easygoing performance bull that sires tremendous length of body, loads of volume and extra rear end. He is a minimal sort sire whose calves weigh up heavy at weaning and yearling and offer lots of payweight in the feedlot. The first daughters are sound-structured, hard-working young cows with strong udder attachment and excellent maternal behavior. It appears they will last a long time. Co-owned with Neiman Cattle Co.

- N Bar Prime Time D806
- Sinclair C Pride 5P64 2F21
- N Bar Clova Pride S C C 2F21

This calving ease son of Full Bore has been used successfully on heifers. He posts individual ratios of 99 at birth, 110 weaning and 108 yearling out of a dam who records 8 calves at 98 birth ratio, 8 at 105 weaning and 7 at 102 yearling. His dam is very long and level in her topline with great neck extension and has super udder attachment with ideal teat size at 10 years of age. As an added bonus, both Cold Powder and his dam are extremely docile and he seems to be passing this on to his first calves with regularity. Expect good frame and length with average muscle and bone. He has the shape of a true calving ease sire.

This powerful son of Full Bore offers growth and maternal performance with added longevity bred in. He was the standout bull of the 2012 calf crop from day one and has never looked back. In his first proof at 9R Land & Cattle his steer calves outweighed those by the highly proven ABS Foresight bull by 30 pounds despite having a 24 pound disadvantage in weaning EPD. The first registered calves are ratioing 102 at weaning and 107 at yearling. Genes for production and longevity are set on both sides of the pedigree, but particularly on the dam side where his dam is still youthful and productive at 12. Most impressive is his grand dam that raised 13 natural calves on schedule before she was flushed and then lived to 20.

 1025

Pictured at 14 months right after coming home off of fall range, this bull is a strong representation of the best in Rito and Emulation breeding. He has been a stand out since birth and will see use here for some time. His proven sire is a true curve bending bull that ranks in the top 15% of the breed for carcass weight, but then can shut the growth down as his daughters rank in the lightest 20% of the breed for mature weight. Equally as important they may have the best hoof shape and depth of heel of any Angus bull we have used. His EXT dam is a model Angus range cow with a flawless production recording 10 calves at a 96 birth ratio, 11 at 102 weaning ratio and 9 at 105 yearling ratio. She is still very sound and in embryo production today at 17 years of age.

BENFIELD ELLIOT 029

AAA# 16761931 · Born 3/2/10

CALVING EASE ★★★★★

Hero 6267 of R R 2418
 H A Image Maker 0415
 H A Rito Blackcap 9038
 Jauer Java 8136
 Benfield Edella 1105
 Benfield Edella 7813

Full-brother to Benfield Substance at Genex, Elliott is the product of a proven mating from an outstanding dam. He is a surefire calving-ease sire that is well above average for yearling weight, much like his popular sire. Phenotypically, he is long-spined and good structured with more mass and muscle than most Image Maker sons. Expect his daughters to be similar type to the Image Makers with more fleshing ability.

Dam - N Bar Kinochtry Beauty Z1925

Maternal Brother - Sinclair Entrepreneur 8R101,
 senior herd sire at McCumber Angus, ND

Double Grand Sire - N Bar Emulation EXT

Vindicator could prove to be a very important breeding piece to help preserve and continue the most influential and utilized bloodline in history. Despite a high level of inbreeding this bull has exhibited excellent growth performance. He offers more frame and better scrotal circumference than most EXT bred bulls with a 36.5 cm measure at 13 months. This bull has tremendous length, neck extension and width of chest floor with more bone than you would expect with this pedigree. With a 50% relationship to EXT and a 37% relationship to Emulation 31 while also coming from a dam that produced to age 17, expect his progeny to be fertile and long lasting. He ranks in the top 4% of the breed for projected feed savings on his daughters (\$EN), while still being in the top 40% for weaning output (\$W). We are seeking a registered partner to help get a proof on this bull. Call Travis if interested.

BEEF COW PROTOCOLS - 2016

HEAT DETECTION

Select Synch

Select Synch + CIDR®

PG 6-day CIDR®

Heat detect and AI days 0 to 3. Administer CIDR to non-responders and heat detect and AI days 9 to 12. Protocol may be used in heifers.

HEAT DETECT & TIME AI (TAI)

Select Synch & TAI

Heat detect and AI day 6 to 10 and TAI all non-responders 72 - 84 hr after PG with GnRH at TAI.

Select Synch + CIDR® & TAI

Heat detect and AI day 7 to 10 and TAI all non-responders 72 - 84 hr after PG with GnRH at TAI.

PG 6-day CIDR® & TAI

Heat detect & AI days 0 to 3. Administer CIDR to non-responders & heat detect and AI days 9 to 12. TAI non-responders 72 - 84 hr after CIDR removal with GnRH at AI. Protocol may be used in heifers.

FIXED-TIME AI (TAI)*

7-day CO-Synch + CIDR®

Perform TAI at 60 to 66 hr after PG with GnRH at TAI.

5-day CO-Synch + CIDR®

Perform TAI at 72 ± 2 hr after CIDR removal with GnRH at TAI. Two injections of PG 8 ± 2 hr apart are required for this protocol.

FIXED-TIME AI (TAI)*

for *Bos Indicus* cows only

PG 5-day CO-Synch + CIDR®

Perform TAI at 66 ± 2 hr after CIDR removal with GnRH at TAI. Two injections of PG 8 ± 2 hr apart are required for this protocol.

* The time listed for "Fixed-time AI" should be considered as the approximate average time of insemination. This should be based on the number of cows to inseminate, labor, and facilities.

- GnRH Cystorelin®, Factrel®, Fertagy1®, OvaCyst®, GONABreed®
- PG estroPLAN®, Estrumate®, In-Synch®, Lutalyse®, ProstaMate®

BEEF HEIFER PROTOCOLS - 2016

ABS and AI Can Add Value to Your Program Through...

✓ Enhanced Reproductive Efficiency

The first 30 days of your calving season are critical to your success. Females that conceive early in the breeding season wean bigger calves, remain in the herd longer and generate more lifetime profit. Let ABS help set your heifers and young cows up for long term success.

✓ Cost Savings

With today's bull prices, AI is a cost competitive alternative to natural service that can extend your bull power and save you money.

Bull Prices are at Unprecedented Levels				
Natural Service Cost per Pregnancy				
Bull Purchase Price	\$4,000	\$6,000	\$8,000	\$10,000
15 cows for 3 years	\$139.62	\$195.40	\$251.18	\$306.96
20 cows for 3 years	\$104.72	\$146.55	\$188.38	\$230.22
25 cows for 3 years	\$83.77	\$117.24	\$150.71	\$184.17
30 cows for 3 years	\$69.81	\$97.70	\$125.59	\$153.48

Assumes \$1,800 salvage value, \$1,000 feed, facilities and veterinary expenses, 95% pregnancy rate, 6% risk and 5% interest rate

AI Costs are equal or less than Natural Service				
Synchronization & AI Cost Per Pregnancy with Fixed Time AI	Pregnancy Rate			
	40%	50%	60%	70%
MGA PG & Fixed Time AI	\$83.75	\$67.00	\$55.83	\$47.86
7-Day Co-Synch + CIDR	\$111.25	\$89.00	\$74.17	\$63.57
14-Day CIDR – PG & Fixed Time AI	\$105.00	\$84.00	\$70.00	\$60.00

Calculated using Iowa Beef Center Synchronization Systems Planner: www.iowabeefcenter.org
Assumes \$2.50 cost for prostaglandin and GnRH, \$2.50 for MGA, \$11.00 CIDR cost, \$26 combined semen and technician cost

✓ Added Genetic Value

AI gives you the unmatched ability to incorporate high accuracy, proven genetics into your herd. Choosing high accuracy sires can reliably add value to both your calf crop and for the long term betterment of your cow herd. ABS' long-term focus on profit based genetic value from Pasture to Plate sets us apart.

Take Advantage of this Opportunity to...

- ✓ Get the best ABS bulls at the best prices
Compare the quality and quantity of our Special offering to any of our competitors
- ✓ Ensure availability on our most popular sires
- ✓ Mix & match bulls listed to get the volume prices
- ✓ Combine with the ABS exclusive Beef Deferred Program for 0% financing through Nov. 10, 2016**

ABS Genetic Service Toolbox

- Full Service Convenience
- Proven Genetics to Drive Profit
- Enhanced Productivity
- Cost Savings vs. Natural Service
- Improved Maternal Genetics
- Increased Marketability
